BSL Underwater Camera – SubC Rayfin Coastal

General Specifications

- Small light-weight camera system
- Mountable to any seabed sampling equipment
- UHD (4k) video footage
- 500m depth rating

Services

Benthic Solutions Ltd operates a number of Subc RAyfin Mk2 Coastal subsea cameras The Rayfin Coastal delivers high-performance, field-proven results for shallow-water and drop/tow surveys and inspections. With SubC's proprietary BPC (Boost-Power Comms) technology, you get power, video, control, and data over a single twisted pair or coax, slashing cabling costs and simplifying your setup.

Stream live video to the surface while recording footage the way you need it—either to internal storage or directly to a topside PC. No matter the mission, you get real-time visibility and reliable, high-quality data capture every time.

.
