BSL Water Sampling – Gas Sampler

General Specifications

- Gas and fluid sampler
- Option for vaccum for shallow water operations
- Flow through sampler
- Option for capture cone
- Lightweight for easy of operation from manipulator
- Size variation from 300 to 1000cm^3
- Maximum allowable filling pressure 124 bar (1240m)

Services

Benthic Solutions can provide additional ProServ gas recovery samplers for ROV recovery of gas and liquid seeps at depth. These are typically set to a vaccum and are used only used once for later testing at the laboratory.

Standard gases are:

- Argon
- Nitrogen
- Helium
- Carbon monoxide
- Methane
- Hydrocarbon gas mixtures

Specifics

Item	Value
Shipping weight	2-5KG/Unit
Shipping dimensions (L,W,H)	50 x 240-369mm or 101 x 247 (volume specific)
Sample size	300 to 1000cm^3
